Figure 1 consists of 12 histograms arranged vertically, each corresponding to a value of n from 1 to 12. The x-axis for all histograms is labeled 'x' and ranges from 0 to 12. The y-axis is labeled 'count' and ranges from 0 to 10. The histograms show the distribution of the number of non-zero elements in the vector x . For $n=1$, the distribution is uniform across all values from 0 to 12. As n increases, the distribution becomes increasingly concentrated around $x=0$, with the peak count at $x=0$ increasing significantly for larger n .
